

STEPPING STONES NETWORK MOMS & KIDS PROGRAM

Stepping Stones Network (SSN) operates in Chicagoland, primarily in Lake, Cook and DuPage counties. The Stepping Stones Network Moms & Kids Program provides long-term, high-touchpoint services for survivors of sex trafficking or sex for survival who are mothers with children. Services treat both mother and child as client in facilitating their road to recovery while protecting them from additional exploitation.

Program Services (12-24 months)

- **Housing & Basic Needs:** Family receives case management to coordinate subsidized housing, utilities, benefits, and other needs in a scattered site, independent living model. Subsidies vary based on need and program stage.
- **Adult Development:** Each adult is assigned a Coach and Coaching Group that meets weekly. Therapeutic assessment, counseling, specialty coaching and adult group programming are offered to address purpose, home management, financial empowerment, health and wellness, spirituality, parenting, relationships, trauma and addiction recovery, and education and job preparation. Depending on location and program stage, participants may engage virtually or face-to-face at SSN's Adult & Child Development Center in Libertyville, IL.
- **Child Development:** Parenting and pregnancy coaching is provided, as well as Individual Child Development Plans. Childcare is provided when Moms are in face-to-face programming. SSN partners closely with Safe Families for Children to provide respite care.
- **Safe Circle:** The participant family is surrounded by staff members and volunteers who provide a sense of community and family-like support via home visits, phone calls and video conversations.

Eligibility

- A mother with one or more children in custody OR confirmed pregnant and planning to keep the baby OR actively working to regain custody of children in our location.
- At least 18 years of age OR an emancipated minor OR in foster care under DCFS guardianship
- A victim of sex trafficking currently or in the past OR has engaged in sex for survival to provide for her children OR she and/or children are being sexually exploited and/or are at high risk for being trafficked. May have evidence or be suspected by SSN or referring agency.
- Capable of pursuing growth in life skills and holistic health and determined to actively participate in building a new life and moving toward economic independence.
- Capable of living independently.
- English speaking.
- If history of substance addiction, must have completed a rehab program, be 30 days clean, be compliant/active with an outpatient program, and be willing to submit to random drug testing.
- SSN does not discriminate; however, referring agencies should be aware that SSN is "faith-based, free to choose" and due to grant funding for under-served populations, a high percentage of SSN's program spots are allocated to black or African-American families from the south and west sides of Chicago.
